

Vladislav Gavronski

vladislavgavronski@yahoo.com - +44 7447768355 – Active SC Clearance

Location and Availability

Available for full-time work (1 month notice) • Remote/Hybrid/On-site in Glasgow • Remote/Hybrid in Edinburgh • Remote anywhere in the UK • Willing to relocate to London or Edinburgh

Personal Statement

Security Analyst with experience investigating and responding to security incidents across enterprise and cloud environments. Skilled in security monitoring, alert triage, threat hunting, incident response, and customer-facing investigations using SIEM, EDR, NDR, and cloud security platforms. Experienced in analysing complex security events, performing containment actions, and communicating technical findings to both customers and internal stakeholders. Active Security Clearance holder with a strong background in Microsoft and AWS environments.

Education

- **2022-2024 Glasgow Caledonian University** - First Class BSc (Hons) Cyber Security and Networks
- **2020-2022 City of Glasgow College** - HND Cyber Security - A

Certifications

• AWS Certified Cloud Practitioner (2023) • CompTIA Network+ (2024) • Splunk Core Certified User, Power User, Advanced Power User, Enterprise Certified Admin (2025) • AWS Certified Solutions Architect Associate (2026) • Microsoft Certified: Security Operations Analyst Associate (SC-200) (2026)

Work Experience

Security Analyst(Hybrid) at Sapphire | October 2025 – Present

- Investigate and respond to enterprise security incidents across Microsoft Sentinel, Exabeam, Darktrace and Google SecOps environments.
- Perform alert triage, event correlation, and in-depth incident investigation using telemetry from SIEM, EDR, and network detection systems.
- Conduct threat intelligence-driven threat hunting across multiple environments, analysing historical logs and security data to identify suspicious behaviour and emerging attack patterns.
- Tuned Microsoft Sentinel and Exabeam detections, reducing false positives while improving investigation efficiency across customer environments.
- Produced customer-facing incident reports documenting attack timelines, root cause, indicators of compromise, containment actions and remediation recommendations, enabling faster recovery and informed security decisions.
- Work directly with customers during incident review calls, explaining findings, answering technical questions, and providing guidance on investigation and response actions.
- Execute incident response and containment actions when required, including resetting compromised credentials, isolating endpoints, revoking sessions, and initiating security scans via Microsoft Defender and other security platforms.

Security Engineer(Hybrid) at Adarma | January 2025 – June 2025

- Designed and optimised Splunk SIEM detections, building actionable alerts, correlation searches, and onboarding AWS, Azure, Windows, Linux, firewall, and Okta logs to enhance SOC monitoring and incident investigation.
- Performed IOC analysis, event correlation, and proactive threat hunting, improving detection accuracy and reducing MTTR.
- Developed and implemented incident response workflows and decision trees to standardise SOC triage and escalation.
- Mapped detections to the MITRE ATT&CK framework, covering relevant TTPs.
- Built and tested security automation playbooks to enrich alerts, automate SOC tasks, and speed investigations.
- Delivered security solutions meeting SLAs, compliance standards, and client requirements.
- Triage alerts and pivoted across multiple log sources to validate incidents, enrich context, and escalate confirmed threats for remediation.

Operational Technology Engineer(Hybrid) at CPI | June 2024 – January 2025

- Deployed AWS Greengrass and OPC UA servers, enabling secure integration of IoT and industrial automation systems.
- Designed serverless AWS workflows (S3, API Gateway, Lambda, Step Functions, SES) for event-driven automation.
- Configured IAM least-privilege policies and trust roles to strengthen security posture.
- Managed cloud infrastructure via Terraform and implemented AWS CloudWatch logging for system observability.
- Produced IEC 62443-compliant documentation, contributing to GMP-regulated projects.
- Organized network resources using IPAM for streamlined infrastructure management.

Skills

SIEM Engineering & Administration (Splunk, Microsoft Sentinel, Exabeam) • Detection Engineering & Alert Tuning • Threat Hunting & IOC Analysis • Security Incident Investigation • Incident Response & Containment • Microsoft Defender XDR • Darktrace • Security Automation & Playbook Development • KQL & SPL Query Development • Data Onboarding & Log Normalisation • Cloud Security (AWS & Azure) • AWS (Lambda, S3, API Gateway, Step Functions, SES, IAM, CloudWatch) • Terraform (IaC) • MITRE ATT&CK Mapping • SCADA & Industrial Security (AWS Greengrass, OPC UA, Zenon) • IEC 62443 • NIST • ISO 27001

Projects

- **Phishing Test Development:** Designed a phishing simulation and interactive handbook using ChatGPT 4.0, increasing employee awareness and improving phishing detection capabilities within the organization.
